BUILDING AUTOMATION SYSTEMS (BAS)

With over twenty-three years of experience in Building Automation Systems (BAS), we are a well-established BAS control company that has participated in thousands of projects to help clients realize the promise of BAS. We have had a long standing commitment to Greater Toronto Area and the Golden Horseshoe and enable our clients to reduce energy and operating costs while improving occupant comfort.

We work closely with clients to understand and leverage their BAS to satisfy all occupant, financial and environmental needs. We've developed advanced services in BAS integration, BAS installation (design/build, bid and specification, and negotiated) and BAS preventative maintenance that empower clients to operate more efficient facilities at lower costs.

Our unique portfolio of projects qualify us to service a wide range of clients in various market sectors such as institutional, healthcare, commercial and industrial.

We enable facility owners, managers and operators to have the most flexible, manageable and energy efficient BAS available with options such as:

- INSTALLATION
- PREVENTATIVE MAINTENANCE
- SERVICE TRACKER™
- TRAINING
- REGULAR CLIENT MEETINGS
- CRITICAL ALARM MATRICES (CAM)
- OPERATING COST REDUCTIONS
- ENERGY ANALYSIS
- ENERGY ANALYTICS W/ FAULT DETECTION
- MONITORING

Our advanced services and offerings allow clients to harness technology and embrace transparency in today's day-to-day operations.

To learn more about our company, products and services please visit our website at www.airongroup.ca or reach out to us anytime by phone 905-331-6555 or email info@airongroup.ca. We have offices in Toronto, Burlington and Barrie.
