Identification.

Critical System Alarms
Emailed to Dispatch Cent

Within the large number of alarms output, the ANT system pin-points the alarms that require immediate attention in real time. Thus, minimizing unsafe and inefficient equipment operation.

ANTs (Alarm Nano Transmissions)

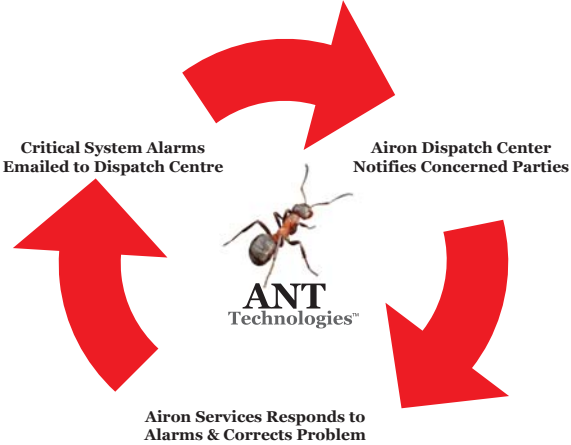

Small but detailed emails sent via the BAS system.

Dispatch.

Dispatch center contacts the appropriate person(s). Via detailed messages and internet access to the site, often problems can be resolved temporarily or permanently without going to site.

Resolution.

Emergencies are resolved with an immediate response. Remote temporary fixes can be addressed the next business day at much lower rates by:
